Tour Itinerary

The water of the Mataking island is amazingly high visibility, with many corals and well-protected ones. There are more than 1,000 kinds of fish, attracting many rare fish such as scorpion fish and green-tailed lip fish. In addition, turtles are also regulars here, even in shallows are likely to encounter. Timba-timba island is known for the wonderful beach great to look for rare marine life that includes large cuttlefish, frog fish, crab, sea snakes and sometimes nurse sharks hiding under table coral. While turtles can be seen in numbers other frequent sights include blue ribbon eels, moray eels, barracudas, lobster, large coral trout and snappers. Pom-Pom island is surrounded by a coastline of 2.3 kilometers and the surrounding coral reefs are 4 kilometers long. The island is flat, the highest elevation of less than 2 meters. The reefs in the west are only 50-75 meters wide, while the islands around them are mostly islands hundreds of meters wide. The island has white sandy beaches, coral beaches, and is also a major habitat nesting location for greengrocer turtles with tortoiseshell. There is no village on the island, the smallest human impact, no pollution and is one of the popular diving destinations in the Semporna area.
